

Point Clouds for Revit

Unleash the power of point cloud files in Autodesk Revit

- **Load Veesus point cloud files natively in Revit** and work on them using Revit's own editing tools.
- **Livestream 3D scans captured using Zappcha** via the Zappcha Cloud to effortlessly incorporate mobile 3D scanning into your work.
- **Move data between Veesus applications seamlessly**, including Arena4D, Zappcha, and our plug-ins for Rhino and Solidworks.
- **Instantly access and use point clouds** saved to the Zappcha Cloud to work on projects anywhere, anytime.
